c. In examining the problem of a new generation of high performance U. S. military aircraft, the Committee is interested in learning anything it can from the Agency regarding such questions as the fabrication and welding of air frames made of titanium and other heat resistant metals. We said we had someone who was fairly competent in this field who would be glad to discuss it with Mr. Michaels at his convenience.

d. We should be prepared to respond to the question of where we would apply the knife if we were forced to take cuts of \$10-, \$15-, or \$20 million.

e. One question might concern the effects, from the community standpoint, of a possible 25% cut in NSA funds.

f. Another question might concern the effects on Agency operations, and on the intelligence community generally, of the [redacted] reductions.

2. Mr. Michaels said the briefing would not be scheduled before Friday, 17 May, and quite possibly would be delayed until the following week.

3. Follow-up items.

a. Colonel White wants us to check with Mr. Michaels on Tuesday morning (14 May) to try to nail down the date for the briefing.

b. We will remind Mr. Michaels that we can provide a specialist to discuss the problem of fabrication of heat resistant metals at his convenience.
